

DIY WRAP
Skirts
Handout

Fashion
through science

Step 1:

Measure
around your
waist
circumference
with a strip of
paper

Measure down from
your waist to a desired
length to obtain the
skirt height.

Height	Length
4'-4'5"	16"
4'6" -5'4"	18"
5'5" -6'	21"

Step 2: Mark the waist measurement and add 10-12 inches for the skirt overlay on a paper strip. Trim the excess paper.

Step 3: Trace the waist curve on fabric and draw radiating lines perpendicular to the waist curve.

Step 4: Join the ends of the radiating lines to form a smooth curve and cut out the pattern.

Step 5: Measure out ribbon or bias tape that runs 2-3 times the length of the strip.

Step 6: Pin the bias tape or ribbon to the waistline, starting from the center and working your way to the sides.

Step 7: Sew the bias tape or ribbon to the waistline and remove pins along the way.

Step 8: Sew or serge along the hemline of the skirt as well.

Step 9: Your skirt is now ready to wear!
