

We are Engineers!

1. Name 3 things you use in your daily life that might have been designed by engineers:

- a. _____
- b. _____
- c. _____

2. How do you think engineers come up with ideas to solve problems?

3. Engineering Problem: If you were to design _____ (*pick your favorite*) _____ that could _____ what steps would you follow (or what process would you go through) to come up with a solution? Put your steps into the box below:

- Shoes.....make you fly
- A bag.....hold an infinite amount of things
- Bowls.....hold their contents even if knocked over
- Packaging.....disappear/dissolve
- A pen.....write from your thoughts
