Across

- 5. The point of connection between two bones or elements of a skeleton.
- 6. Joint that allows for bending and unbending around one plane in a folding motion.
- 8. The arrangement, type, and ratio of atoms in molecules of substances.
- 9. The process of scuffing, scratching, wearing down or rubbing away.
- 11. A textile formed when multiple yarns cross each other at right angles to form the grain, like a basket.
- 12. A brand of high-density non woven polyethylene fibers.

Down

- 1. Joint made of a bone with a rounded end that sits inside another bone with a cup-shaped opening.
- 2. A textile formed when one continuous yarn is looped repeatedly so it resembles a tiny row of braids.
- 3. How much a fabric/fiber stretches as a percentage of starting length.
- 4. Made from a web of fibers and may be held together by melting, adhesives, or tangling fibers.
- 7. A synthetic fiber known specifically for its elasticity and recovery.
- 10. Any of a large class of synthetic fabrics.
